Theater Lighting

STARLINE TRACK BUSWAY

Superior lighting power distribution that's easy to see.

The curtain never falls on Starline Track Busway's lighting capabilities. For decades, our long tradition of innovation has provided new and flexible methods for overhead lighting grid systems. Combining the reliability of busway construction and the versatility of track lighting, it offers a customizable array of power outlet boxes and drop cords for the ever-changing needs of theaters, concerts, and other events. With systems rated for both AC and DC power, you also have the ability to integrate alternative energy sources. It's smart, efficient, and customizable power distribution for any lighting application.
