

## VERSATILE POWER AND LIGHTING FOR HIGH PERFORMANCE BUILDINGS.

In changing office environments, the ability to connect to power can be a point of frustration for building owners and tenants alike. Starline Track Busway incorporates power and lighting in one simple solution. The busway is quick and easy to install—saving you money on installation—and gives you the ability to draw power from wherever you need it. Starline can be customized to meet your existing power requirements while providing flexibility for future changes and expansions.

### APPLICATIONS

-  Modular workspaces
-  Think tanks, Business incubators
-  Multitenant environments
-  Retrofit facilities

### FEATURES

Combines lighting and power distribution in one ideal solution for retrofit or new builds

Modular design allows for quick and easy tenant improvements over life of building

Flexible and reusable without complicated rewiring for new leasehold improvements

Easily adaptable surface-mounted or overhead power distribution

Safe design allows end users to add or move plug-in modules without shutting down power

### TECH DATA
