

## Increased Ingress Protection With Unmatched Versatility

**Starline Series-S Track Busway** combines Track Busway's proven performance, functionality, and flexibility with the added benefit of an IP54 ingress protection rating. It is available from 100-1200 amps and allows users to install the system anywhere additional water, dust, or other contaminants require up to an IP54 rating. The protection level extends to our uniquely designed plug-in units, which are offered with a wide variety of watertight IEC and NEMA devices to meet any need.

### SERVICE OFFERING

#### Need assistance?

Our team of in-house service technicians are ready to assist you with a comprehensive package of implementation services.

### BENEFITS

- Quick and simple installation reduces downtime and labor costs
- Flexible and scalable for future changes
- Customizable and versatile power to match your exact layout
