

Flexible Power for Modern Golf Cart Charging

For golf courses looking to optimize cart charging operations, Starline Track Busway delivers unmatched flexibility and scalability to charging infrastructure. Busway's open channel design provides continuous access to pluggable space, meaning you can add, remove, or relocate your chargers in minutes—all without needing an electrician. Additionally, chargers can be suspended directly from the busway housing, eliminating the need for supporting hardware.

BENEFITS

- Fast and simple installation
- Flexible system streamlines fleet modifications or expansions
- Improved operational efficiency

FEATURES

- Compatible with all cart charger models
- Customizable, modular layout to best suit your space
- Perfect solution for gas to electric fleet conversion or upgrades to Li-Ion charging
- In-house services team can assist with on-site installation
- Available with ingress protection up to IP54, rated up to 600V
