

Why more retail facilities are sold on flexible power.

Starline Plug-In Raceway was created to meet the ever-changing power distribution needs of the fast-paced retail environment. Though it may look like other raceway products, Starline Plug-In Raceway has the unique ability to add or relocate plug-in modules anywhere on the raceway quickly and easily. You simply snap the pre-assembled plug-in modules into place on the raceway backplane and the connection to power is made automatically without having to interrupt power. Plus, an optional Datacom channel is available for data, video and audio applications.

BENEFITS

-  Reduced Installation Costs
-  Flexible and Scalable
-  Reliable

FEATURES

- Safe design allows end users to add plug-in modules without cutting power
- Low installation costs due to its patented prewired bus-type raceway design
- Flexible design allows receptacle plug-in modules to be added or relocated anywhere on the raceway quickly and easily
- Breaker and non-breaker single phase and three phase plug-in modules (up to 30 amps)

TECH DATA

- Lengths of 2.5, 5 and 10 ft (1, 2 and 3 m)
- Field cutting allows users to make accurate sizing with no errors
- 20 or 60 amp systems; 120V single phase, 240V 3 phase (UL, ETL) & 277/480V (max) 3 phase (IEC)
- Case, dedicated or isolated ground
