

Changing the Game for Fitness Power & Networking

STARLINE
PLUG-IN RACEWAY

Redefining flexible power & networking for today's fitness needs.

The Starline PIRFIT (Plug-In Raceway for Fitness) system is an integrated power and data cabling solution designed specifically for fitness applications. The PIRFIT system reduces 85-90% of home runs normally required for power, coax, and network cabling to console-type treadmills, ellipticals, and other fitness equipment—eliminating thousands of feet of wiring and reducing dozens of labor hours. PIRFIT's innovative design also allows for receptacles to be added or moved when additional power is needed.

BENEFITS

Cost Savings

Flexible and Scalable

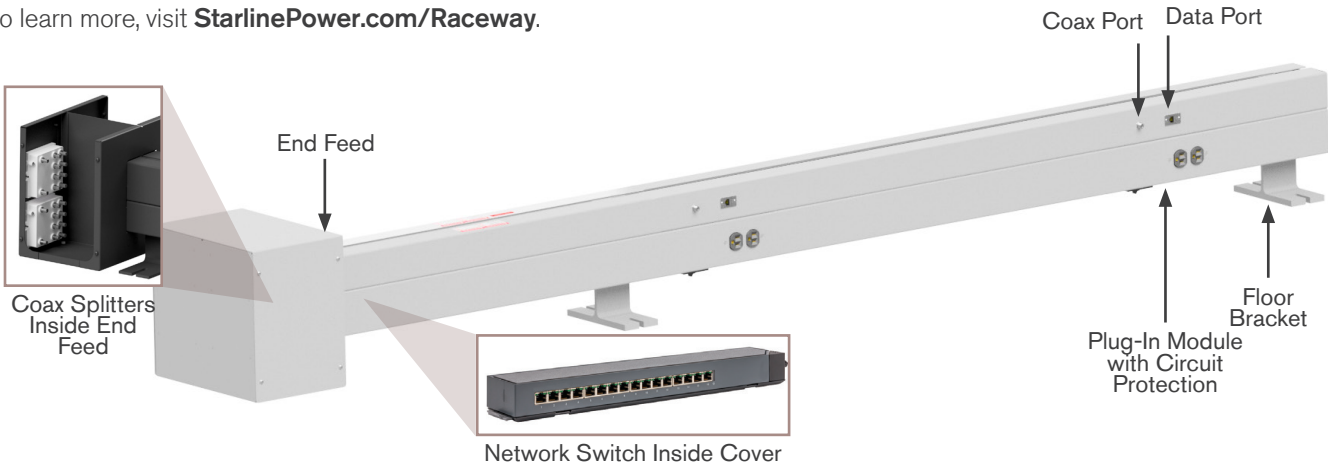

Reliable

Customizable
